

BINDING AGREEMENT

Institutional Terms of Service

Effective Date: September 1, 2026 **Version:** 2.1 **Target:** Educational Institutions & Operators

Important Notice: These Terms of Service constitute a legally binding contract between your educational institution ("Customer" or "School") and SchoolLinx Inc. ("Provider"). Provisioning a school node constitutes explicit acceptance of these terms.

1. Platform Scope & Dedicated Schema Provisioning

SchoolLinx grants the School a non-exclusive, non-transferable worldwide license to access the cloud management platform. Each subscribed institution is allocated:

- An isolated PostgreSQL schema namespace with complete relational data partitioning.
- Dedicated subdomains (e.g., `yourschool.schoollinx.app`) and optional custom domain SSL routing.
- Full academic management suites: Student 360° Registry, Speed Gradebook, Attendance, Timetables, Fee Recovery, and Communication Gateways.

2. 99.99% Service Level Agreement (SLA)

- **Availability Commitment:** Provider guarantees **99.99% monthly operational uptime** across all student portals, teacher gradebooks, and financial ledger APIs.
- **Maintenance Windows:** Routine upgrades occur during off-peak windows (11:00 PM – 3:00 AM local time) with 72 hours advance notice.
- **Service Credits:** If monthly uptime drops below 99.90% (excluding scheduled maintenance or force majeure carrier outages), the school is entitled to a 10% credit towards the subsequent academic term subscription.

3. Subscription Tiers, Billing & Invoicing

Billing Model	Payment Frequency	Settlement & Grace Period
Per-Student Per-Term	Billed at the onset of each academic term based on active enrolled student headcount.	14-day grace period from invoice issuance before feature throttling.
Annual Enterprise Tier	Billed annually with fixed multi-term discounts and inclusive dedicated support SLA.	30-day settlement cycle via direct bank transfer or Paystack enterprise invoice.

Payment Processing: Online settlements are processed via Paystack (PCI-DSS Level 1 certified). Subscriptions remain active through the 14-day grace period to prevent educational disruption for enrolled pupils.

4. Multi-Carrier SMS Gateway & Sender ID Compliance

- **Legitimate Communications:** The SMS engine must be utilized strictly for legitimate academic notices, emergency campus alerts, fee reminders, and attendance check-in alerts.
- **Sender ID Registration:** Custom alphanumeric Sender IDs are subject to national telecommunications carrier vetting. Spam, unauthorized promotions, or phishing transmissions result in immediate API key termination.
- **Carrier Failover:** The platform dynamically reroutes traffic between primary and backup SMS carriers to ensure 99.8% message delivery success rates.

5. Biometric Attendance & Guardian Verification Security

- Schools deploying biometric check-ins or QR pickup verification verify that parental consent has been secured in compliance with local child protection regulations.
- Pickup verification codes are temporary and single-use, expiring immediately upon physical pupil departure from the campus premises.

6. Verifiable Academic Transcripts

- Transcripts and completion certificates generated through SchoolLinx contain cryptographic SHA-256 verification hashes registered in our verifiable registry.
- The issuing school holds full legal liability for the veracity and accuracy of the academic grades embedded in verified documents.

7. Account Governance & Role Delegation

- **Primary SuperAdmin:** The institution's appointed administrator holds sole authority to delegate bursar, teacher, and registrar roles.
- **Two-Factor Authentication:** Multi-factor authentication (2FA) is strongly mandated for all accounts possessing fiscal ledger or export privileges.

8. Termination & Seamless Data Export

- Either party may terminate the agreement upon 30 days written notice prior to the start of a new academic term.
- The school retains unrestricted rights to export complete student, grade, and fiscal ledgers (JSON, CSV, PDF) prior to schema deletion.

9. Limitation of Liability

In no event shall SchoolLinux Inc. be liable for indirect, punitive, or consequential damages resulting from local telecommunication network interruptions or third-party electrical power disruptions outside our direct cloud infrastructure.
